Subject: South Dayton Dump - revision of select OU2 RI/FS comments
[App-B-CSM figures.pdf](#)
[SDD - Addt CH2M OU2 RIFS Comms - 120513.docx](#)

Leslie/Maddie –

During our last regulators call you requested that CH2M HILL provide additional information and clarification regarding several of our review comments for the OU2 RI/FS work plan. The action items from that call included:

- [REDACTED] Simplified review comment on the statistical background comparison section
- [REDACTED] Clarification on the VI review comments
- [REDACTED] Discussion on exposed waste at ground surface, and how that might be addressed in a risk assessment
- [REDACTED] Clarification on the ERA comments, specifically Row 26 (including attachment) of the CH2M HILL Excel file.

Please find attached a Word document that includes discussion on the statistical background comparison section, exposed waste at the surface, and VI issues. Also attached is a “App B CSM Figures” PDF file which includes the hand markup comments we referenced in our original comments.

One side comment - in regards to the discussion of sampling the exposed waste at the surface in OU2 for risk assessment, CH2M HILL has identified several factors to consider but recommends that USEPA and Ohio EPA discuss the matter as the ultimate risk managers for the site. This was a significant discussion topic with OEPA during the OU1 Streamlined FS review.

Please let us know if you have questions or concerns regarding these additional comments.

Thank you.

Brett A. Fishwild

Associate Project Manager
